# 1. Introduction

#### 1.1 About this document

Digital DomPul is a MUST HAVE but seeing at current competitive landscape, need a STRONG value proposition to give RO a REASON-TO-USE. Digitalization on traditional 151 UMB and SMS is a must to begin the service journey to hybrid/native Cloud. The important thing after development is a technical documentation regarding the service. It's required for enhancement purpose and operational matter. The purpose of this document is to describe detail technical specification of digital Dompul Services. Its a complete description of the services based on requirement and design assessment.

#### 1.2 Intended audience

This document addresses RO Player / Server to develop end to end digital dompul platform.
